MEMORIAL RADIOLOGY & DIAGNOSTIC IMAGING INSTITUTE

DIVISION OF NEURORADIOLOGY & ADVANCED BRAIN IMAGING
CLIA # 39D0654321 • CAP # 7182940 • JCAHO ACCREDITED

HIGH-RESOLUTION 3T MAGNETIC RESONANCE IMAGING (MRI) OF THE BRAIN

Patient Name: Sophia Lin	**Patient ID (MRN):** PAT-2004-5501	**DOB / Age / Sex:** 1997-11-05 (29Y / Female)
Accession #: MRI-2026-99014	**Ordering Provider:** Dr. Daniel Foster, MD	**Report Date/Time:** 2026-05-18 11:15 EST
Specimen / Exam: Brain MRI Without and With MultiHance IV Contrast (3.0 Tesla)	**Status: FINAL SIGNED REPORT**	**Facility Code:** SJMH-MAIN-CAMPUS

CLINICAL INDICATION & ALLERGY SAFETY:

Investigation of recurrent unilateral throbbing headache with visual aura. Evaluate for intracranial aneurysm, mass lesion, or demyelinating plaques. Patient completed neuro-imaging questionnaire. **Patient reports a history of allergies** to environmental allergens and contact adhesives. No contraindications to gadolinium contrast.

TECHNIQUE & SEQUENCE PARAMETERS:

3.0 Tesla MR imaging performed using 32-channel head coil. Multiplanar T1-weighted, T2-weighted, FLAIR, diffusion-weighted imaging (DWI), ADC maps, and 3D TOF intracranial MR angiography.

ANATOMIC FINDINGS:

BRAIN PARENCHYMA: Cerebral hemispheres demonstrate normal gray-white matter differentiation. No acute territorial ischemia, hemorrhage, or mass effect. No evidence of multiple sclerosis demyelination plaques.
VENTRICLES & CISTERNS: Ventricular system and basal cisterns are normal in caliber and configuration for age.
VASCULATURE: 3D Time-of-Flight MRA reveals normal flow signal in the anterior and posterior circulations. No intracranial aneurysm or vascular malformation identified.
EXTRA-AXIAL SPACES: Calvarium and skull base are intact. Paranasal sinuses and mastoid air cells are well-aerated.

IMPRESSION:

1. Normal brain MRI and intracranial MR angiography.
2. No intracranial mass lesion, acute infarct, or intracranial aneurysm.
3. Findings compatible with migraine with aura.
