Report Title: Comprehensive Aeroallergen Panel - Serum Specific IgE
Patient Name: Arthur Pendelton Patient ID: PAT-2001
Date of Birth: 1972-04-12 (Age 54) Sex: Male
Accession ID: ALG-2026-44019 Test Date: 2026-08-20
Referring Specialist: Dr. Elena Rostova, MD

CLINICAL INDICATION & ASSESSMENT:
Patient reports a history of allergies dating back to early adulthood. Primary complaints include recurrent sneezing, nasal pruritus, and ocular watering during spring and late summer months.

PROCEDURAL NOTE:
Allergy testing was performed using high-affinity quantitative fluorometric enzyme immunoassays to measure circulating allergen-specific IgE antibodies.

ALLERGEN TESTED	RESULT (kU/L)	CLASS	INTERPRETATION
Birch Pollen (Betula verrucosa)	14.8	Class 3	High Positive
Timothy Grass (Phleum pratense)	22.4	Class 4	Very High Positive
Ragweed (Ambrosia elatior)	8.6	Class 2	Moderate Positive
Dust Mite (Dermatophagoides pter)	18.2	Class 4	Very High Positive
Alternaria tenuis (Mold)	2.1	Class 1	Low Positive
Cat Dander Epithelium	0.4	Class 0	Normal / Undetected
Dog Dander Epithelium	0.2	Class 0	Normal / Undetected

Report Title: Comprehensive Aeroallergen Panel - Serum Specific IgE
Patient Name: Arthur Pendelton Patient ID: PAT-2001
Accession ID: ALG-2026-44019 Test Date: 2026-08-20

DIAGNOSTIC IMPRESSION:

1. Marked perennial indoor environmental allergy to house dust mites.
2. Significant seasonal allergy to grass pollens and tree pollens.
3. No significant sensitization detected to feline or canine animal danders.

MANAGEMENT & RECOMMENDATIONS:

1. Environmental allergen mitigation: Encasing pillows and mattresses in micro-porous allergy covers; utilizing HEPA filtration units in sleeping quarters.
2. Pharmacotherapy: Daily second-generation oral antihistamine (cetirizine 10mg PO QD) and fluticasone propionate nasal spray 50mcg (1 spray each nostril daily).
3. Sublingual allergen immunotherapy protocol discussed as long-term disease modifying strategy. Patient will consider allergy immunotherapy options at next review.
4. Routine 6-month clinical follow-up scheduled in allergy clinic.
